Changing Work: Working Change

Game Changer

Paul Doherty, AIA, President and CEO (www.thedigitgroupinc.com) is a pioneer in the application of Building Information Modeling (BIM). He is one of the global industry's most sought after thought leaders, strategists and integrators of process, technology and business. A Senior Fellow of the Design Futures Council, an award winning architect, specifier, author, educator, analyst and advisor to Fortune 500 organizations, global government agencies, prominent institutions and the most prestigious A/E/C firms in the world.

Paul's current work is focused on Smart City real estate developments that include financing, design-build and technology solutions in the USA, Australia, Europe, MENA, India, Southeast Asia and China. Concurrently, Paul is the co-founder and producer of the critically acclaimed AEC Hackathon (www.aechackathon.com) that launched at Facebook Headquarters in Silicon Valley.

Changing our Work Changing our World Paul Doherty the digit group

As our world quickly emerges as large, urban environments, our industry is being challenged with integrating our buildings and infrastructure into the urban fabric of Smart City initiatives and innovations. Big Data, the Internet of Things, Augmented/Virtual Reality, Kinetic Energy, Autonomous Vehicles and Drones are but a few of the rapidly evolving innovations that specifiers and other industry players need to understand and address today.

The stewardship of the digital DNA of our built environment through data-centric tools like CAD and BIM is no longer valued just for the individual building project, but rather the extended value is in the interconnection and interoperability of this data in the context of Smart Buildings, Smart Neighborhoods and Smart Cities, all driven by innovation.

Join us for a discussion that will define Smart Cities, identify Smart Buildings and provide participants with best practices, lessons learned and a framework strategy for their organizations.
